CENSUS OF INDIA, 1921

VOLUME VIII

BOMBAY PRESIDENCY

PART III

REPORT AND TABLES--ADEN

BY

E. M. DUGGAN

CHAIRMAN, ADEN SETTLEMENT COMMITTEE

IN CHARGE OF CENSUS OPERATIONS, ADEN

PARV

BOMBAY
PRINTED AT THE GOVERNMENT CENTRAL PRESS
1923

REPORT.

PREVIOUS ENUMERATIONS.

1. The first Census of the Bombay Presidency (of which Aden is administratively speaking a part) was held in 1854 when an estimate of the population was made but it was not till 1872 that the first enumeration was attempted and its accuracy is extremely doubtful. From 1881 inclusive however organized counts have been taken at ten-year intervals and the general results will be found in Imperial Table II. The Census of the 18th March 1921 may therefore be said to be the seventh of any description, the sixth based on an actual count and the fifth of reasonable accuracy. The reader who wishes to obtain a general idea of the results of this last Census with the minimum of trouble should turn to paragraph 9 hereafter.

CONDUCT OF PRESENT ENUMERATION.

2. The Chairman of the Aden Settlement Committee was appointed as the Officer in charge of the Census Operations and commenced work in July 1920. Captain J. Gordon of the Bombay Political Department who was acting as Chairman during my absence on leave was the Officer in charge of the operations until the end of September 1920 when Major J. C. Tate of the same Department took over charge until my return from leave in the middle of October. The first step taken was the preparation of the General Village Register in which was shown a complete list of the various divisions of Aden and its dependencies, the number of houses and the number of workers available for the enumeration. The divisions were then divided into blocks, 50 houses on the average going to a block in the Crater, Maalla and Tawahi divisions and 100 houses on the average going to a block in Sheikh Othman. The blocks were grouped into circles and the circles into charges. The numbers are shown below:—

Charges	8
Circles	27
Blocks	170

All the charge Superintendents, supervisors and enumerators were engaged from Government and Local Fund offices. One outsider volunteered to do work as enumerator and only two paid men had to be engaged. All charge Superintendents, supervisors and enumerators were given a practical demonstration by me of what they had to do. The need for this and the difficulty involved in the taking of a Census in a place of this nature was well illustrated by the answer of an enumerator who, when asked by me as to what entry he would make for the age of a *purdah* lady whom he could not see and whose male relative refused to give it, replied "I would make a guess at it!" I admit the problem defeated me so I told him to leave the entry blank. As the schedules were filled in, they were gradually checked and rechecked by all Superior Officers right up to the Census night. The only exception was in the case of the enumeration of houseless people and of the Port population which took place on the final night of the Census. A very slight dislocation was caused owing to the unavoidable absence on that night of certain enumerators but their places were filled up without difficulty by reserve enumerators. The date selected for the final Census did not coincide with any big holiday. The Aden Jews who live for the most part in the Crater division abstain from doing any work or business between 6 p.m. on Fridays and 6 p.m. on Saturdays, but although the final Census night—the 18th March 1921—was a Friday this caused no practical inconvenience and everything passed off smoothly and well. All enumerators went out as soon as it was dark to take the final check. New comers and newly born children were added to the list and persons who were absent on that date from Aden and its dependencies were struck off the list. The next morning all enumerators, supervisors and Charge Superintendents met together. The enumerators checked each other's totals. The supervisor then combined the block totals into a circle total. The Charge Superintendents then added up the totals of all the blocks and furnished them to me. Every one concerned worked with a will and I was able to telegraph the totals to the Census Commissioner at Simla and to the Provincial Superintendent at

Poona on the 19th March 1921 or on the day after the Census night. Special care was taken that these provisional totals showing the numbers of occupied houses, males, females and total population should be as accurate as possible and the final recorded result only varied from the revised provisional totals by about 0.12 per cent. The revised provisional total was 56,571 and the finally recorded total was 56,500. The total number of Census Officers employed was 255 or 0.4 per cent of the subsequently ascertained population. Owing to the large number of houseless people in Aden 63 Census Officers were employed in enumerating them on the night of the final Census.

STATISTICS DECIDED ON

3. Certain changes in the volume of Imperial Tables etc. were ordered in General Department Order No. 406 dated the 13th January 1921 and it was decided by Government that information regarding Aden should be excluded from the Imperial Tables of 1921 except Tables I and II and that the information excluded should be printed by the Chairman, Aden Settlement, in the form of a separate volume. Correspondence then ensued with the Provincial Superintendent of Census Operations Poona and details as to the working and salaries of the Abstraction office were arranged with him. He very kindly supplied me free of cost with the requisite number of slips, sorter's tickets, abstraction tables etc. etc.

In my letter No. 390 dated the 31st May 1921 I stated that I had decided to print the following tables:

Imperial Tables Nos. I, II, VI, VII, VIII, X, XII, XIII (on the same lines as last Census), XV, XVI(a) and XVI(b), XVII, XXII (all parts) and Provincial Table No. 1.

The above arrangements were reported both to the Provincial Superintendent of Census Operations and to the Census Commissioner, Simla. No returns of Registers were sent to the Provincial Superintendent of Census Operations as in his letter No. Ahs/23 dated the 9th June 1921 he had left the whole matter to me.

TABULATION OF RESULTS

4. An Abstraction office was opened early in April 1921 in the Aden Settlement office and three temporary whole time clerks were engaged in copying and preparing the Census Tables. Four half time checkers, one half time supervisor and one Deputy Superintendent were appointed to check and supervise the whole thing. Owing to the work of the Aden Settlement certain changes had to be made in the personnel but fortunately only among the checkers. There was practically no change from the procedure of 1911. The first thing done was to copy out from the schedules the particulars of each individual on to a slip 2" x 4 1/2". The colour of the slip indicated the religion, civil condition was shown by a symbol of varying shape and sex by the symbol being solid for a male and merely outlined for a female. The remaining details such as age, caste, occupation, birth place, language, literacy, knowledge of English and infirmities had to be written up in pencil. This copying and checking was completed by the end of June 1921.

Sorting was then commenced. Pigeon holes were provided and slips were arranged therein in accordance with the details required for each table. Bundles of a hundred were tied up in the great majority of cases and the requisite figures were entered on sorter's tickets. This method enabled a good and continuous check to be exercised by the supervising staff and the sorters had no opportunity to conceal or make away with slips. When any discrepancy arose Register A was at once referred to and the mistakes were corrected, on one occasion (sorting of table VII) one slip was found missing and all the general schedules had to be looked up again and the particular slip was re-written. Fortunately except for this incident nothing worth mentioning took place and the sorting passed off successfully and was completed on the 30th September 1921. Side by side with the sorting one temporary clerk was detached to do the preparation of all tables from the sorter's tickets. This work was practically completed on the 25th October 1921. All the sorter's tickets and tables were then finally checked and the whole work of tabulation was completed by the 25th October 1921.

Cost.

5. The cost of the present Census has been Rs. 4,718 as compared with Rs. 1,873 in that of 1911. This cost is shared in equal proportions between the Government and the Aden Settlement Fund. The increase is due partly to the increase of the population enumerated but mainly to the great rise in wages and the cost of all materials.

SUGGESTIONS FOR THE NEXT CENSUS.

6. The following brief suggestions may be of use to the officer who is placed in charge of the next Census Operations:—

Preliminary and final enumeration.

The general arrangements should be much the same as those made in the present Census. The work should commence early in July or August at the latest and all necessary details must be settled before January so as to be ready for the Census to be taken in March of the next year. Care should be taken to employ as many men as possible who have worked in the present Census and who may be in Aden at the time. The great thing to do is to select the present *supervisors* for this work if they are still available.

Census Abstraction.—Copyists and sorters.

Intelligent whole-time men should be employed for this work, as it is rather technical and requires a good deal of local knowledge.

Checkers.

In the present Census men in the permanent employ of the Aden Settlement were working half time only and were given a bonus of Rs. 60 each.

This work requires careful supervision and was done under great difficulties. I would very strongly recommend that full-time men be employed for this work and that they should temporarily be taken from the permanent staff for the purpose.

Supervisor.

This officer should also be a full-time man and should conduct all correspondence, keep charge of the records and supervise the working of the checkers as soon as their portion of the work is finished.

Deputy Superintendent of Census.

This officer should also be a full-time officer and should devote his whole time and energy to Census work right from the beginning of July or so up to August of the next year.

ACKNOWLEDGMENTS.

7. My thanks are due in the first place to the whole population of Aden both Civil and Military, official and non-official, as without their hearty co-operation and help the conduct of the Census would have been a much more difficult matter than it was. In spite of the heterogeneous nature of the people and of the fact that so large a proportion of them are illiterate immigrants from comparatively uncivilized areas no trouble of any sort arose—a striking tribute to the good sense and amiability of the people and to the tact exercised by the enumerators in paying their house-to-house visits. Among the actual workers the first and foremost was Mr. E. R. Kanga, the Secretary and Head Assessor to the Aden Settlement Committee. He was appointed Deputy Superintendent of Census for Aden and placed on whole-time special duty for the work. His experience gained in the previous Census and his whole-hearted devotion to duty in the present one were invaluable and I owe him a deep debt of gratitude.

The following gentlemen also rendered material help and co-operation both in the actual enumeration and in the tabulation work afterwards:—

- | | |
|---------------------------|--|
| 1. Mr. Premji Meghji | .. Supervisor, Charge A, and Supervisor of Census Abstraction and Tabulation work. |
| 2. Mr. J. N. Pajnigar | .. Supervisor, Charge C, and Checker of Census Tables. |
| 3. Mr. Sayed M. Irshadali | .. Supervisor, Charge C. |
| 4. Mr. Abdul Habib | .. Supervisor, Port Limits. |
| 5. Mr. W. A. Morris | .. Supervisor, Perim Coal Co. Division. |

6. Mr. Ismail Abdulla	.. Enumerator and outsider Volunteer.
7. Mr. Ali Ahmed Khan	.. Sheikh Othman Houseless Block Supervisor.
8. Mr. Mohamed A. Rahim	.. Supervisor, Perim.
9. Mr. Ajedya Singh	.. Census Enumerator, Military Limits.
10. Mr. Saeed Moosa	.. Enumerator and Checker.
11. Mr. Saeed S. Bamadhaf	.. Do.
12. Mr. Dulpatram Samji	.. Do.
13. Mr. Shapurji Sorabji	.. Do.
14. Mr. Mohamed Lall Khan	.. Do.
15. Mr. Sayed Mohamed Hydershaw	.. Do.

Lastly I wish especially to mention the Military and the Aden Police to whose tactful help and assistance the complete absence of disturbances of any kind was largely due.

DESCRIPTION OF ADEN.

8. Before proceeding to the results of the Census a brief description of the place will, it is hoped, not be unwelcome. The Settlement, as it is called, of Aden consists of four parts. The first of these and the most important is Aden itself, a rocky peninsula of volcanic origin and about 20 square miles in area bearing in many respects a strong resemblance to Gibraltar. This is connected to the mainland of Arabia by a sandy isthmus about three miles long and one broad called Khor Maksar and on the mainland near the end of this isthmus is the large village or small town of Sheikh Othman with its outlying hamlets of Imad and Hiswa. Between the Peninsula of Aden itself to the South and the mainland to the North lies the bay forming the harbour which is bounded on the East by the Isthmus of Khor Maksar and on the West by another rocky peninsula known as Little Aden. The above make up the British territory of Aden but in addition to it this Census deals also with the small British island of Perim at the Southern entrance to the Red Sea. In addition to its importance as a fortress Aden is a coaling station and oil fuel depôt for both ships of war and mercantile vessels. It also has a flourishing export trade in coffee, hides, skins, gums, spices, ostrich feathers, pearls and other commodities produced in the surrounding countries but for all of these it is an entrepot or collecting centre only and it serves in a similar manner as a distributing centre for imported piece-goods, hardware, kerosene oil and grain, etc. The sole local product of any importance to which Aden itself can lay claim is salt which is made by evaporating sea water and of which about 150,000 tons are exported annually, most of it going to Calcutta.

The assorted nature of its trade is reflected in the kaleidoscopic variety of the inhabitants of the place and of the languages they speak. English, Americans, French, Italians and Greeks, Somalis and Abyssinians, Arabs of all descriptions and Arabian Jews and every kind of Indian with a sprinkling of Persians, Chinese and other Asiatics earn their livelihood on the barren rocks of Aden though not a single one of them by agriculture. Their meat in the shape of sheep and goats comes from Somaliland, their grain and rice from India, their vegetables such as they are from Lahaj 30 miles away on the mainland, their drinking water is either distilled sea water or that from brackish and salt impregnated wells which might make the fortune of a Spa but is certainly unpleasant in its effects when used as a daily diet. In fact everything they eat is imported except the excellent fish which swarm in the surrounding seas.

GENERAL RESULTS.

9. I have already had occasion to use the results of the Census for various purposes such as water supply and electricity schemes, etc., and have found that admirable though they may be for general statistical purposes the standard tables laid down are not fully suitable for local investigations, mainly owing to the fact that the population of Aden is concentrated in certain well-defined and separated areas. I have therefore prepared the additional tables which will be found immediately after this report and before the standard tables. The Special Table 1 gives the results of the present and past counts in moderate detail. Special Table 2 is a summary and Special Table 3 gives the percentage increase in population in the various localities over the decennial periods.

From the Special Table I it will be seen that the population counted in 1921 amounted to 56,500 made up as follows :—

Place.	Males.	Females.	Total.	Ratio of females to males ; 1 to
Crater ..	12,245	8,183	20,428	1·5
Maalla ..	2,206	1,185	3,391	1·9
Tawahi and St. Point ..	5,903	2,127	8,030	2·8
Port ..	1,647	83	1,730	20·
Total in civil limits in Fortress ..	22,001	11,578	33,579	1·9
Sheikh Othman and hamlets ..	6,430	4,876	11,306	1·3
Total in civil limits in Aden Settlement ..	28,431	16,451	44,885	1·7
Cantonment and Military ..	8,287	1,253	9,540	6·6
Total in Fortress ..	32,194	17,538	49,732	1·8
Total in Settlement ..	35,330	17,702	53,032	2·
Perim ..	1,676	399	2,075	4·2
Grand Total ..	38,391	18,106	56,500	2·1

The high percentage of males to females even among the civil population as compared with Western countries is noticeable. It is due to the fact that so many of the population of Aden are males who come there only to work and leave their families in the Hinterland or wherever their homes may be. It is satisfactory to notice from Special Table 3 that we are steadily reducing the numbers of the "Houseless" population. These people are immigrant coolies and labourers and beggars the control of whom constitutes one of our difficulties in Aden and who are a constant thorn in the side of the sanitarian.

Among the civil population the main increase in the last decade has taken place at Sheikh Othman, Maalla and Tawahi and for the time being at least the Crater would seem to have about reached the limits of its capacity.

E. M. DUGGAN,

Chairman, Aden Port Trust and Aden Settlement
Committee, and Officer in charge of the Census.

15th March 1923.

PROVINCIAL TABLE I—AREA AND POPULATION OF THANA (TAHSILS, ETC.)

Sorters employed on counting the slips, were on piece-work and the rate was Re. 1 for 20,000 slips.

ling.

28. Gangs of ten sorters under one supervisor were formed and assistant supervisors were entertained when the most difficult tables were in hand. The gangs were equally distributed between inspectors for supervising the work. Sorters' tickets of various tables with instructions in vernacular on the back were printed at the Government Central Press and supplied to all offices; the supply was based on the number of boxes made up for sorting and the religions for which the slips were to be sorted.

The undermentioned rates were paid in the Poona office for sorting work:—

		Rs.	a.	p.	
Table VII	0	0	3 per 100 slips.
Table VIII for mofussil	0	0	1½ per 100 slips.
Do. for Bombay	0	0	3 per 100 slips.
Table IX	0	1	0 per 100 slips.
Table X	0	0	6 per 100 slips.
Table XI for mofussil	0	0	1½ per 100 slips.
Do. for towns	0	0	2 per 100 slips.
Do. for Bombay	0	0	3 per 100 slips.
Table XIII	0	0	4 per 100 slips.
Table XIV	0	0	3½ per 100 slips.
Table XVI	0	0	0 per diem and Re. 1 per mensem attendance allowance.
Tables XVII and XVIII	0	0	3 per diem or 1 anna per hour or fraction thereof.
Table XV	15	0	0 per mensem.

Sorting commences from Table VII and before it commenced for any table, the sorter's first duty was to write on labels the different items to be sorted for and paste them against the pigeon-holes. The inspectors were specially warned to see that this rule was enforced.

Generally two boxes, one for males and one for females, were supplied to each sorter, and when the sorting for one box containing male slips was finished, it was transferred to the supervisor for checking, and in the meanwhile the sorter sorted the female slips in the second box. This arrangement was followed in the case of all tables, which were sorted from the general slips except Tables XII and XIIa, which were sorted for from the special slips for infirmities.

Separate boxes for each district or state as a whole were made for slips of infirmities and these were sorted by special gangs.

Detailed instructions for sorting are to be found in Arts. 6 to 31 of Ch. III of the Tabulation Code and translations in vernacular were printed on the back of the various tables for the guidance of sorters and supervisors. In addition the following circulars were issued for the guidance of Abstraction Offices in connection with each table:—

IMPERIAL TABLES VII AND VIII.

No. 617, dated 31st May 1911.

Tables VII and VIII will be divided into three parts:—

- I Total population,
- II Districts and
- III Cities

In part I separate totals should be given for British Territory and Native States. A combined total should also be given. In parts II and III figures need be given only for the total population and for the religions which were taken at the last Census.

IMPERIAL TABLE X.

No. 1731, dated 22nd August 1911.

No classifications of languages is to be attempted in an Abstraction Office. Looking at last Census returns as shown in Table X, part II, it seems that all languages have not been sorted as returned. This must be done as classification can only be done in this office, and the details of all districts returned are required.

No. 1851, dated 6th September 1911.

Some Abstraction Offices have apparently understood paragraph 2 of Article 10 of Chapter III of the Code to mean that districts should be classified before sorting. All districts must be shown and sorted *as returned in the schedules*, as was done on the occasion of the last Census. Tables and Registers not in accordance with the above instructions are being returned for further action.

IMPERIAL TABLE XIII.

Circular No. 323 of 3rd May 1911.

List No. 1 showing castes selected for the purpose of Tables IX, XII-A, XIV and XVI is herewith forwarded. For Muhammadans only two groups need be taken—

- (1) Bohras, Khojas, Memons and Telis or Ghanchis.
- (2) Others.

For Table XIII.—Castes shown in List No. 1 + Castes shown in List No. II (herewith forwarded) should be taken for the districts concerned. Where any caste like Shrimáli Vánis follows more than one religion the slips for Jains and Hindus should be separately sorted and counted. This applies to all these tables. For the Provincial Table II, a list of learned and backward castes and tribes is also enclosed.

General.

These lists are based entirely on the last census tables and must *not* be taken as accepting all the castes shown therein. The castes to be accepted for this census tables are those given in the caste index with such additions and amendments as are made by this office on the weekly reports submitted by the Deputy Superintendents. New sub-divisions of castes like those of Kolis and Kunbis should be shown in accordance with the instructions which will issue later when sorting shows what sub-divisions have been returned. *All such slips will have to be sorted and counted to begin with* though it may be decided not to *print* all the figures thus obtained. For the purpose of Provincial Table II *all* the learned and backward castes, however poorly represented, must be separately sorted when sorting for Table XIII, but other castes unless shown in Lists I and II need *not* be separately sorted and counted. There will not be much saving of sorting work but the final tables will be relieved of numerous petty castes which appeared last time. If there is any doubt about the selection for these special tables of the castes accepted for this census, a reference should be made and orders will then be issued.

No. 415, dated 10th May 1911 (for Aden).

For Table XIII castes shown in list No. I, castes shown in list No. II (herewith forwarded)* should be taken for Aden. Where any caste like Shrimáli Vánis follows more than one religion the slips for Jains and Hindus should be separately sorted and counted. This applies to all these tables.

* See appendix II to this chapter.

General

These lists are based entirely on the last Census Tables and must *not* be taken as accepting all the castes shown therein. The castes to be accepted for this Census Tables are those given in the caste index with such additions and amendments as are made by this office on the weekly reports submitted by the Deputy Superintendent. New subdivisions of castes like those of Kolis and Kunbis should be shown in accordance with the instructions which will issue later when sorting shows that subdivisions have been returned. *All such slips will have to be sorted and counted to begin with*, though it may be decided not to print all the figures thus obtained.

Provincial Tables are *not* required and Table IX, XII A, XVI and XIV are also quite useless for Aden.

No 352 dated 4th May 1911 (for Sind).

The following Castes are selected for Tables IX, XII A and XIV —

MUSALMAN—

- 1 Balochi
- 2 Bráhm
- 3 Bohora Memon and Khoja
- 4 Other Muhammadans

HINDU (as per list No 1)—

- Bhil
- Bráhmán
- Dhed
- Khitri
- Koli
- Kurmi
- Mazbi Sikh
- Rajput
- Sonár
- Vani—
- Bhatia
- Lohána

CHRISTIAN—Anglo-Indians and Native Christians

For Table XIII all Muhammadan Tribes (to be classified as far as possible in accord-
ance with the list of tribes circulated for the guidance of Census Officers) Hindus as per
list No 1 for all districts—Castes shown in list No II for each district concerned

FOR TABLE XVI.

MUHAMMADAN—

- (1) Bohora, Memon and Khoja
- (2) Others

HINDU—As per list No 1

No 1003, dated 26th June 1911

In sorting for Table XIII care should be taken to separate all slips for Coornese persons. Last census they were merged unfortunately in the general group of Native Christians. It may be found that they have returned themselves under various names such as Last Indian and the like, but all doubtful cases can be settled by looking at the language entry.

SPECIAL TABLES OF CASTES—IX, XIIA XIV, XVI

No 304, dated 20th June 1911

Separate sorters tickets should be prepared for all Kuntá sub-castes in the Khándesh districts and in the District and States abstracted in the Ahmedábád office as you will

have sorted them already for Table XIII, and the figures may be interesting. For the Compilation Register only Kunbi and Koli main castes need be taken.

No. 1755, dated 24th August 1911.

In lists I and II certain sub-castes of Bráhmans and Vánis are selected for the special Tables IX, XIIA, XIV and XVI and for XIII. In addition special orders have issued to some offices as regards the sorting of Kunbi and Koli sub-castes. But in all cases the *total* figures for these main castes, Bráhmans, Vanis, Kolis and Kunbis, must *also* be given for each district and if any Table or Register has omitted this, the omission should now be rectified.

In giving the totals of Vánis, only Vánis proper should be taken. The so-called Marátha Vánis, such as are given below, should be grouped together as Marátha Vánis and a separate total given. Details for them are only to be given according to list II for certain districts.

MARATHA VANIS :—

- 1 Kudale.
- 2 Sangmeshwari.
- 3 Kulin or Kunbi.
- 4 Patane.
- 5 Devkule.
- 6 Neve.
- 7 Kathar.
- 8 Kharote.

IMPERIAL TABLE XVA.

No. 755, dated 9th June 1911.

The alphabetical list of occupations referred to in this office, No. 1958, dated 22nd March 1911, has been received but an examination of this index raises grave doubts whether its translation will assist sorters in any way. The list comprises in alphabetical order all descriptions in English of occupations that have ever been returned in India, and many of the trades, industries, etc., are of course unknown on this side. Translation is in many cases impossible. The task when completed will be of little use because we require an alphabetical list of ordinary vernacular terms, not of translations of bad English. A complete list which would enable a sorter (credited with no intelligence) to turn up any description he may find on a slip and find the number of the proper group is impossible, but we can assist him greatly, and at the same time train some inspectors, etc., who will be able to answer sorters' questions by adopting the following procedure :—

Take appendix forwarded with this office No. 1958, dated 22nd March 1911, and the vernacular schedules for any large cities which probably contain all the occupations likely to be met. Write down each such description with the group number against it, and generally you will obtain a list which you can arrange alphabetically, of all the terms ordinarily used in schedules. Very elaborate descriptions such as "school-master, private English school", need not be entered in full; "school-master" is sufficient. Note that servants are generally referred to the trade or industry or form of transport, etc., which they work unless they are private servants, but in the case of theatrical companies, actors are separated from managers and servants other than those actually acting etc. Put one or two men on to this work and check the entries yourself, send me a few sheets at a time to see how the work is being done. Do not enter under trade those who certainly make as well as sell the articles. Sellers in India are in a more advanced stage than those who both make and sell, and even when the entry is—shop, consider if it is likely that such goods are only sold and not also made. In the latter case, of course, look under industry. Do not enter at all descriptions which give no real clue; such entries will require a further reference or must be returned as unspecified. The Sind list should be kept at Hyderabad, and I will see it when I come.

No 842, dated 12th—16th June 1911

In continuation of this office note No 755, dated 9th June 1911, the following remarks will help perhaps in framing the required index.

1. Use both appendices I and II (II of course is a slip for I in the above note) to clear up doubtful cases. Copies of the English index will also be forwarded when received and can be used in the same way.

2. The general principle underlying this classification is to be as precise as possible, e.g., do not refer to big groups like Army or Public Administration if you can find a more definite group which covers the kind of work done. Thus "followers" are referred to 'Army', but a draughtsman in the Military Works or a painter in the Arsenal should be classed according to their trades. A *pattarala*, however, comes under 145, as messenger (the alternative) is a vague term in any case, and a military bandsman is a private soldier and comes under Army. Employes, including clerks, generally are referred to their masters' class as already noted (but 166 covers all clerks, salesmen, etc., in shops whether the latter are specified or not). Note, however, that a carpenter working in coaching works would be classed as a carpenter.

3. As soon as it is found that fresh terms are not forthcoming in the schedules of any particular quarter of a city, pass on to another quarter or city. It is useless to waste time over an area which has been practically exhausted and as much ground must be covered as possible and that without delay.

No 1122, dated 27th July 1911

Please see page 44, Article 16, Chapter IV, Census Code, part II. The code contemplates sorting in the first instance without the assistance of any index and without the application of any group numbers. In this office No 1199 of the 10th instant, it has been explained that the printed vernacular indices supplied should be distributed to all sorters in the first instance, and that all new entries found in the schedules should be classified by the supervisors if a solution is easy and an entry made in the index showing the group assigned. By both methods the bulk of the sorting will be done by the ordinary sorters and only a small residue will be left for treatment by selected hands.

2. The classification sheet is identical with the sorter's ticket. All that is required therefore after the first sorting is to take the sorters' tickets and after examining the slips for 'others', i.e., all doubtful and difficult cases, to amend the ticket. There is no necessity to use a separate classification sheet at all if with the help of the index group numbers have already been assigned in all simple cases. It will be best to enter all doubtful occupations found, without assigning a group, in the sorters index, and submit index, sorter's tickets and slips to the special gang for examination, completion and amendment where necessary. Severe notice must be taken of any slip sorting unless in exact agreement with the index as supplied or supported by a fresh entry in such index. The pigeon holes should be labelled of course with the group numbers (names also if desired) of the principal occupations selected as described in the Code.

Extract from paragraph III of Notes for report from the Census Commissioner for India—Chapter XII—Occupations —

Classification of occupations

"In the past the principal causes of error in filling up schedules have been (1) confusion between a man's traditional and his actual occupation, and (2) the use of vague terms such as "service", "clerk", "contractor", "shopkeeper", "labourer", and the like. It should be stated to what extent such mistakes have been made on the present occasion. It should also be noted (quoting the rule) how far the line between workers and dependants has been correctly drawn. The instructions given in the code were as follows

The entry of occupations in columns 9 to 11 of the schedules is another matter requiring special care. Only those women and children will be shown as workers who help to augment the family income. A woman who looks after her house and cooks the

Food is not a worker but a dependant. But a woman who collects and sells firewood or cowdung is thereby adding to the family income, and should be shown as a worker. So also a woman who regularly assists her husband in his work (*e.g.*, the wife of a potter who fetches the clay from which he makes his pots) but not one who merely renders a little occasional help. A boy who sometimes looks after his father's cattle is a dependant, but one who is a regular cowherd should be recorded as such in column 9. Boys at school or college should be entered as dependants. Dependants on a joint family, the members of which follow different avocations, should be entered in column II under the occupations of the principal working member.

Domestic servants must be entered as cook, blisti etc., in column 9, and not in column 11, as dependants on their master's occupation. Persons temporarily out of employ should be shown as following their previous occupation.

Errors in compilation.—Difficulties must arise in finding a suitable place for certain mixed occupations which overlap the detailed groups shown in the scheme and in cases where closely allied occupations have been differentiated in order to avoid too great a departure from M. Bertillon's scheme *e.g.*, labour on roads, railways and canals. In dealing with this branch of the subject, the compilation procedure should be briefly described together with precautions which were taken in order to prevent or detect mistakes."

No. 777-A of 1911, Poona, 11th June 1911.

Forwarded to the Deputy Superintendent of all Census Abstraction offices with a request to note roughly (1) the percentage of such mistakes found in classifying for the Occupation Tables and report their conclusions as soon as the compilation register is finished, and (2) to subscribe briefly the measures taken to meet the second set of difficulties. Orders will issue as occasion arises and references should be made to this office in special cases of difficulty.

2. The castes of prisoners in large jails (but not in Taluka lock-ups) should be separately sorted if possible. Such jails will invariably be a separate block if not a separate circle, and when sorting commences for Table XIII the slips for such circle or block can be kept apart in a *rumal* and the figures for such jails entered in red ink above or below the Taluka figures in the sorters' tickets which can be headed Taluka (including —jail), and the same for the compilation register. Head-quarter jails only should be selected and no jail containing less than 100 prisoners should as a rule be so treated.

IMPERIAL TABLE XVI.

No. 1199, dated 10th July 1911.

The first of these tables is Table XVI, the vernacular index of occupation will help for this table also, if each sorter has a sorter's ticket by him, and on the ticket the numbers of groups are entered in the appropriate columns; the pigeon-holes can then be *numbered* according to the numbers of the columns in the sorter's ticket from column 8 onwards, and it will generally be easy for any sorter to decide *with the help of his supervisor* whether an entry falls under groups 9, 13, 21, 93, etc., under industries, minerals, transport, public force, and public administration. Sort first without differentiating between owners and labourers etc. etc., and then re-sort these bundles for columns 14, 19, 21, 24. For the more detailed sorting required by Table XVA no sorter should be allowed to put any slip in a pigeon-hole unless the entry corresponds *in all particulars* with that in his index. If it does not, he must ask his supervisor and make *an entry in his index* showing the group under which it has been taken. These corrected indices should be sent to this office when the tables are finished; so entries should be clearly written. Doubtful cases will of course be classed as 'others' to be dealt with *later* as described in article 15 (page 26) Chapter III.

I give below the group numbers covered by the columns of the sorters' tickets for

Table XVI:—

Sorters' Ticket Column.	Group Number.	Sorters' Ticket Column.	Group Number.
8	1	21, 22	140 to 144
9	2 & 6	23, 24	145 to 148
10	3, 5 & 7	25	149 to 152
11	4 & 8	26	153 to 157
12	9 to 13	27	158 to 161
13	14 & 15	28	162
14, 15	16 to 20	29	163 & 164
16, 17	21 to 23	30	165 to 167
18, 19	24 to 105	31	168
20	106 to 139	32	169 & 170

(Erratum.)

No. 1606, dated 8/3rd August 1911. This office No. 1199 on occupational tables.

In Table XVI, columns 26 and 27 cover groups 153 to 161, but these are to be distributed according to the population of the persons. The instructions to class groups 153 to 157 as falling under columns 26 and groups 158 to 161 under column 27 are cancelled.

No. 1637, dated 16th August 1911.

Difficulties are arising as regards the different views taken by different offices of some of the traditional occupations, lists of which have been distributed. It would have been better if all the occupations of the selected castes had been classified under the previous columns, instead of calling certain occupations traditional and showing all such together in a separate column, without in many cases differentiating superior and inferior staff. It is impossible to check the figures and one office may class all Brahman clerks under "traditional occupation" viz: writers, while in another office all clerks are correctly grouped when possible according to the offices in which they serve. The rule should be to classify as far as possible under the vague traditional occupations and the following supplementary instructions are now issued to elucidate the figures which are awaited. In the sorter's ticket enter below the figures in columns 8 to 32 for each caste the figures for all entries in columns 5 and 6 classified under the appropriate columns, so that for any caste we can have by addition a complete classified statement of the caste's occupations. Similarly in the compilation registers enter the supplementary figures in columns 7 to 31 below the ordinary figures for all entries in columns 4 and 5.

IMPERIAL TABLE XVII.

No. 1124, dated 3rd June 1911.

A statement showing locality and name of mission and denomination under which it was instructed that converts should be classed if proper sects were not returned, is herewith forwarded.

2. Converts should be classed as 'denomination not returned' unless a recognised sect can be ascertained. Enquires should be made in any numerous class of doubtful entries.

No. 718, dated 6th June 1911.

A revised list showing the heads under which Christians are to be classified is herewith sent. Christian sects, where entries are doubtful, must be investigated.

No. 779, dated 11th June 1911.

Steps should be taken to expedite the compilation of Tables XVII and XVIII. As the number of Christians is usually small and the slips are sorted for each district as a whole, the preparation of these tables will give very little trouble, and there is no objection to taking them up at any time. Sorting by the special gangs (Article II Chapter III) can

35

commence as soon as Table VII is finished. For the cities and prescribed towns these tables should be taken as soon as possible. If Table VII is being sorted take up Tables XVII and XVIII next. If Table VIII has been commenced take them up after that. In cases where sorting has not yet commenced take them in the order VII, XVII and XVIII, and push on as quickly as possible. In these latter offices 25,000 slips per sorter will be a suitable *average*. The slow offices must make up leeway as they keep back all the consolidated returns which are urgently required. Baroda has already sent in Tables I to VI.

No. 781, dated 12th June 1911.

In the standard form of compilation register for Table XVII, no columns have been provided for Armenians, as for the purpose of the Imperial statistics separate figures are not required. In Imperial Table XVII Armenians will be included in the head "European and Allied Races," a note to that effect being made on the title page, as was done in the India Table XVII of the last Census, and reference made to Table XVIII for information regarding their number etc.; columns have been provided for them in the sorters' ticket for Table XVII as well as in that for Table XVIII, partly in order to render comparison between the two sets of tickets easy, and partly because it will simplify the work of the sorters. It would confuse them if they were told, when sorting for Table XVII, to class Armenians with Europeans and in the other to show them separately. The figures for Armenians in the sorters' tickets for Table XVII can be added to those for "Europeans and Allied Races," before they are posted in the compilation register.

29. The order in which each table should be sorted is given in Art. 4 of Chapter III of the Tabulation Code and all tables were sorted accordingly. Miscellaneous
Details.
There was no case of any deviation from this rule.

There would have been a saving of 15 days if orders for sorting the Bombay City special table dealing with the birth-place and occupation of immigrants had been issued before Table XVI had been taken in hand.

Each sorter had the same boxes of slips from start to finish, and he sorted them for all tables.

In addition to sorters' tickets, the following forms were required in the course of sorting :—

H.—Form of Label.

I.—Record Keeper's register of boxes of slips.

J.—Supervisors' register of boxes of slips.

K.—Form of weekly progress report of sorters' work.

L.—Weekly progress report.

They were all locally printed.

COMPILATION STAFF.

30. Compilation commenced on the 28th June 1911, with the appointment of the Head Compiler, and was completed by the end of July 1912. The staff entertained each month together with the month in which it was reduced will be found in Appendix III. Staff.

Compilers, who were temporary hands, drew Rs. 15 per mensem to start with, which was increased to Rs. 20 on their displaying diligence and aptitude. The supervising establishment consisted of Government servants on deputation.

In addition to the compilation of the ordinary Imperial Tables for the Province, there were gangs employed in the Abstraction Offices, one on the

Bombay City Special Tables, which were handed over to the compilation office ready for printing and others on the Village Tables, which were not printed but sent in manuscript to each Collector."

MISCELLANEOUS DETAILS.

Miscellaneous
Details

31. Very little need be said about compilation, which consists of adding together the totals of the various compilation registers, which are based on the sorters' tickets. But human nature is liable to error, and in the absence of a trained staff able to work with machines, the compilation office becomes an investigating department devoted to the discovery and reconciliation of discrepancies. This reconciliation is the easier to make if the compilation office is started early enough to be able to refer a discrepancy to the office responsible for it. Therefore it is essential that the compilation office should be started at the earliest possible opportunity, almost contemporaneously with sorting and thus advance by a series of small but carefully tested totals.

It is essential that totals should be given by talukas as well as districts, as it must be remembered that the B volumes of the Bombay Gazetteer have to be brought up to date, and for them taluka totals are necessary. A scrutiny of these volumes will be useful.

Statistics required for Imperial Tables I, II, and IV and Provincial Tables I and II were compiled in the Compilation Office in original, and those for Tables III, V and VI, which do not require any sorting and particulars for which can be had from A. Registers, were supplied by the Abstraction Offices. The material required for tables from VII and onwards was available from compilation registers and sorters' tickets. Detailed instructions as regards compilation are given in Chapter IV of the Tabulation Code, and they were generally adhered to.

Imperial Table XV, Part E.

Statistics of Industries in four parts, was new on this occasion and was compiled from special Industrial Schedules prescribed by Government. Instructions for the copying, sorting, etc., of slips from these schedules were laid down in Chapter V of the Tabulation Code. All schedules in the province were first collected in the office of the Provincial Superintendent and the work of copying, sorting and compiling was carried out in the Poona Abstraction Office under the supervision of the Deputy Superintendent.

The following are the points in connection with compilation work, which require special mention and they are intended for the guidance of the Provincial Superintendent of Census, 1921:—

(1) It was noticed that figures for some villages shown in Imperial Table III, which is compiled from village tables, did not agree with those shown for the same village in Imperial Table V. The discrepancy was due to the omission or inclusion of train, boat or encampment enumeration figures. The orders in the Code were clear enough, but the mistake seems to have occurred through misunderstanding on the part of the compiling staff in abstraction offices. The compilation office had to effect many changes in figures; but as the village tables were sent direct to the Collectors concerned, and as no office copy was kept, there were no means of checking them in detail. The village tables should be sent to the compilation

offices along with compilation and tabulation registers of Table III, and should be despatched to the Collectors after they have been thoroughly examined.

(2) Imperial Table V shows population of towns by religion. Towns to be shown in this table were selected in consultation with the Collectors and Political Agents of the Districts or States, and a list was forwarded to all Abstraction Offices. Orders as regards figures to be shown for a town are contained in Art. 5 of Chapter IV of the Tabulation Code, but some offices misunderstood them. Train and boat population was included in the case of some towns. There was also much trouble in obtaining correct figures for some municipal towns, especially in Khandesh, owing to every municipality not being made into a separate charge. Where this step is not convenient and it is considered undesirable to increase the number of charge Superintendents, a record of circles and blocks that constitute the municipal area should be sent in by the charge Superintendent.

(3) It is also necessary in the case of specified towns and municipalities to know the taluka in which they are situated.

List No. 1.—*Showing the names of castes, tribes, races, etc., with a numerical strength of 2 per mille in the Presidency Proper.*

Agri.	Gavandi, Uppar or Chunára.	Soni, Sonár or Aksáli.
Ahir.	Gurav or Hugár.	Sutár or Badig.
Berad or Bedar.	Haiám, Nhávi, Nádig.	Teli, Gániger or Ghánchi.
Bhandári.	Halapaik.	Thákur.
Bhangi or Halálkhor.	Kátkari.	Vaddar.
Bharvád, Dhangar or Kurub.	Koli.	Vághri.
Bhil.	Koshti, Hntgár, Jed or Vinkar.	Váni—
Bhoi.	Kumbhár.	Lohána.
Bráhmañ—	Kunbi.	Oswál.
Audich.	Lingáyat.	Shrimáli.
Chitpávan or Konkanasth.	Lohár, Luhár or Kammár	Vanjári.
Deshasth.	Mahár, Holiya or Dhed.	Várlí.
Shenvi or Gaud-Sárasvat.	Máli.	Muhammadians—
Chámbháñ or Mochi, Machigár or Sochi.	Máng or Madig.	Bohora.
Chaturth.	Marátha.	Khoja.
Chatrí or Khatri or Killiket or Katabu.	Máchhi.	Memon.
Darji, Shimpi, Sáí or Mirái.	Naikda.	Pathán.
Dhobi, Parit, Agasá or Madivál.	Panchál.	Sheikh.
Dhodia.	Rahári.	Teli or Ghánchi.
Dubla or Talávia	Rájpút.	Parsis.
	Rámeshti.	Europeans.
	Sáli.	Anglo-Indians.
		Native Christians.

A list of learned and backward castes and tribes

Part A—Learned castes.

Aksáli.	Káyastha.	Pátáño Prabhu.
Bhansáli.	Káyastha Prabhu.	Sonár.
Bhátíá.	Komti or Vaishya.	Soni.
Brahmakshatri.	Lohána.	Váni.
Bráhmañ.	Pánchkalshti.	

Part B—Backward castes.

Advichinchar.	Ghisádi.	Nát.
Ager.	Halleer.	Od (Ode).
Alitkar.	Harkantá.	Padhariá.
Ambi (Ambig).	Holiya or Holer.	Pagi.
Bajánia.	Hulsár (Hulasvár).	Párdhi or Shikári.
Bákad.	Ilgar.	Parit.
Bardá.	Jogi.	Phudgi.
Battál.	Johári.	Pomlá.
Bávchá.	Kabbaligar.	Ráchevar.
Beldár.	Kaikádi.	Rabári.
Berad (Bedar).	Kalál.	Rámoshi.
Bhámbhi.	Kahár.	Rávat.
Bhámtá.	Kanjári.	Rávaliá (Rával).
Bhangi.	Kátari.	Sangar.
Bharvád.	Kátkari.	Sanghar.
Bhil.	Kattái.	Sappalig or Devadig.
Bhisti.	Khálpa.	Sarania.
Bhoi.	Khárva.	Sindhavá.
Burud or Medár.	Khárví.	Takári.
Chámbháñ.	Khavás.	Táru.
Chhapparband.	Kiliket.	Thákar.
Chodhrá.	Kokná.	Thákur.
Dhangar.	Kolghá.	Thori.
Dhavad.	Kolbáti.	Tigalá.
Dhed.	Kotegár.	Tirgar.
Dhodiá.	Korava.	Turi.
Dhor.	Kunchavakkal.	Vaddar.
Dublá.	Lamáni or Vanjári.	Vádi.
Gábit.	Máchhi.	Vághri.
Gámtá.	Mahár.	Vaidu.
Gandhariá.	Máng.	Vaiti.
Ghádi.	Mángela.	Várlí.
Ghadshi.	Miáná.	Vitoliá.
Gond.	Mochi.	Zháreckari.
Gongadigar.	Mukri.	
Gopál.	Naikdá.

CHAPTER III.

COST OF THE CENSUS.

32. Two statements have been prescribed by the Census Commissioner Accounts. for keeping the accounts of census expenditure, *viz.*, Departmental and Treasury accounts. The latter show only extra expenditure which but for the Census operations, would not have been incurred.

The Treasury heads of accounts have been divided into five main heads :—

- (1) Superintendence.
- (2) Enumeration.
- (3) Abstraction and compilation.
- (4) Printing and other Stationery charges, and
- (5) Miscellaneous.

These have been further divided into several sub-heads. The Departmental accounts show the whole expenditure under Treasury accounts *plus* other expenditure which is incurred on account of census and not debited to the census grant. The main difference between the Treasury and Departmental accounts is that in the latter are included the salaries of officers deputed to Census while the acting allowances of their substitutes on the regular staff have been omitted; whereas in the Treasury accounts only the deputation allowances of officers and the acting allowances in the chain of deputed officers are shown.

The Departmental accounts have been divided into three main heads :—

- (a) Enumeration.
- (b) Tabulation, and
- (c) Superintendence.

But these three main heads have been further divided into 25 minor heads, and an attempt has been made as far as possible, by sub-dividing into minor heads, to enable the Provincial Superintendents of the future to see what amount was spent under each minor head.

33. Government Resolution, General Department, No. 4945 of the 8th Aden. October 1910, deals with the subject of "Debit of charges on account of the Census of the Town and Cantonment of Aden." The procedure adopted at this census was the same as on the last occasion, and the Government of India sanctioned the proposal that the Settlement of Aden should bear half the total cost of the Census of the Town and Cantonment of Aden, including the charge on account of forms supplied.

There was a total expenditure of Rs. 1,885-3-2 on account of the Aden Settlement, of which an expenditure of Rs. 1,810-15-9 was incurred by the Settlement in the first instance from the beginning to the end of census operations, and that of Rs. 74-3-5 by Government for forms. A moiety of Rs. 905-7-11 was accordingly paid to the Settlement and that of Rs. 37-1-8 recovered from them; the actual cost to Government being Rs. 942-9-7.

City of Bombay.

34. The procedure adopted in the case of Bombay at this census was different from that followed on the last occasion. Last time Bombay had its own office at Bombay for the abstraction and tabulation of the census results. On this occasion abstraction and compilation were done in the Poona Abstraction Office.

Dr. J. A. Turner, Executive Health Officer, Bombay Municipality, was appointed to supervise the taking of the Census of the City of Bombay under the general orders of the Provincial Superintendent, and a special allowance of Rs. 300 per mensem was paid to him by the Corporation during the period (*vide* Government Resolution, General Department, No. 5088 of 12th October 1910).

The recommendations for the establishment required for the carrying out of the operations lay with Dr. Turner.

The expenditure incurred from the beginning to the end of the Census operations was shared by Government and the Municipality in equal proportions. A sum of Rs. 20,000 was sanctioned by the Municipal Corporation to meet a moiety of these charges. The Municipality undertook to pay all establishment and incidental charges in the first instance, half the charges being paid by the Accountant General's office on receipt of a monthly statement of sanction confirmed by the Provincial Superintendent. Accordingly the Municipality expended Rs. 16,682-1-8 in the first instance towards enumeration from the beginning of the operations to the end of July 1911, of which a moiety of Rs. 8,341-0-10 was paid to that body by the Accountant General under instructions from the Provincial Superintendent, the expenditure being met from the special grant at the disposal of the Census Commissioner for India.

The work of slip copying, slip sorting, special tables and compilation for the city of Bombay was done at a cost of Rs. 8,963-7-10 which was paid in the first instance by Government. The statements of this expenditure were sent on to the Municipal Commissioner for approval and formal sanction, and on their return a moiety, *viz.*, Rs. 4,481-11-11, was adjusted by the Accountant General to the credit of Government.

A further expenditure of Rs. 3,824-8-0 was incurred by the Municipality under the head of enumeration and printing from July 1911 to 31st March 1912. As the moiety of this amount, *viz.*, Rs. 1,912-4, was less than the amount then due from the Municipality, it was taken in reduction of the latter subject to the sanction of the Census Commissioner for India which was subsequently obtained.

The total expenditure for Bombay City amounts therefore to Rs. 30,450 in round figures (excepting cost of printing the Bombay City Report), including travelling allowance and cost of forms, and a moiety of the amount spent by the Municipality has been paid to that body. There is still a charge outstanding, which is unknown at the time of going to press, for printing the Bombay City Report and Tables, and a moiety of that is due from the Corporation.

Census contributions from Native States and Municipalities

35. Some States had their own independent offices for abstracting the results of the census, while the others were dealt with in the Central Abstraction Offices established for the Presidency. Those that fell in the first category

were charged only with the cost of census forms supplied to them ; whereas contributions were levied from the other States on the same basis as from Municipalities.

The rule that regulates recoveries from Municipalities runs thus :—

“The tabulation of the results will be carried out by Government agency, Municipalities contributing towards the cost on the same scale as on the previous occasions, *viz.*, at the rate of three months' salary of one tabulating clerk for every ten thousand of the population dealt with. The amount payable in each case will be fixed by the Provincial Superintendent on the basis of the salaries paid in the office where the tabulation is carried out.”

This rule was made applicable in the case of States dealt with in the Central

States abstracted at.	Rate charged.			Abstraction Offices, and contributions were levied accordingly at the rates noted in the margin per thousand of the population dealt with. In addition to this, the States, with the exception of Bhore, were charged with the cost of enumeration forms.
	Rs.	a.	p.	
Poons	...	4	0	0
Ahmedabad	...	4	4	0
Dharwar	...	4	3	0
Hyderabad	...	4	9	0

The charges incurred on behalf of the following States were borne by Government to the extent specified in the Government Resolutions noted against them.

Government Resolution, General Department, No. 2081 of 28th March 1912. Further charges on account of abstraction and tabulation also were not recovered from the Dangs.

(2) The Thana circles and petty Estates and Tharad and Wao.

Government Resolution, General Department, No. 5934 of 26th August 1911, and Government Resolution, General Department, No. 3938 of 12th June 1911.

(3) Mewasi States in the Rewa Kantha Agency.

These States were exempted from the payment of charges.

Some of the States in the Presidency had deputed their clerks to work in the Abstraction Offices and credit was therefore given to these States at the rate of Rs. 25 per mensem for each clerk for the period he worked.

All the Municipalities paid in their contributions at the rates mentioned, and the cost of forms was not recovered from them.

36. The total expenditure under Treasury heads of account amounts to Rs. 2,39,707-10-6 gross. Recoveries from Municipalities, Native States and miscellaneous credits show Rs. 29,293-8-9, so that the census may be estimated to have cost Government Rs. 2,10,400. This compares very unfavourably with the net cost of the Census of 1901, which is given as Rs. 1,69,234. But Mr. Enthoven's accounts do not appear to give any figures for the printing of the reports which has been estimated on the present occasion at Rs. 11,000. Moreover the sudden change of personnel in charge of the office of Provincial Superintendent caused a good deal of delay and the Abstraction Offices had to be kept open much longer than in 1901.

Notes on the expenditure.

Probably this was due as much to the compilation of additional tables as to the fact that none of the offices worked up to scheduled strength.

Plague in Poona and the comparatively poor pay offered in census offices prevented a full complement of clerks from being entertained. This is a mistaken policy as it is more expensive to keep an office open long than to augment the staff and complete work quickly. But this of course involves the raising of rates.

These unfavourable results, in spite of great good fortune in securing magnificent accommodation in a Government building at Poona, show that successive Provincial Superintendents must expect to find the cost of their operations increase instead of diminish.

SUBSIDIARY TABLE J.

NOTE.—The slight differences between the figures of total expenditure for each year as shown in this statement and in Subsidiary Table I is due to small balances of postage for one year being carried over to the next year. The total expenditure is, however, the same.
